OTTAWA, JANUARY 20TH, 1907.

To Our Friends and Customers:

In presenting this our Eleventh Annual Catalogue of Seeds, &c., we take the opportunity of tendering our thanks to our numerous customers for their liberal patronage in the past and we solicit a continuance of their favours in the future.

NEW PREMISES

Two years ago, we acquired by purchase, the premises 51, 53 and 55 Sparks Street, in order to handle our increasing business with greater satisfaction and comfort to our customers and ourselves; and this season, at considerable outlay, we have converted it into one of the most commodious and attractive SEED and FLORAL establishments in the country. We have also made extensive alterations and improvements in our GREENHOUSE PLANT, so that with our increased facilities, we can now attend to the wants of our customers with accuracy and dispatch, and we therefore look forward to a marked increase in trade. We appeal to those who have not yet favoured us with an order to GIVE US A TRIAL and we are sure that no disappointment will follow.

WE SELL BOTH WHOLESALE AND RETAIL

We are direct importers and we use the greatest care in selecting our Seeds from the most reliable growers in Britain, France, Germany and America.

TESTED SEEDS

We test the seeds we offer and we have the advantage of having the GOVERNMENT SEED TESTING LABORATORY at our disposal, where both the germination and purity test has been reduced to a science. We give no warranty, however, express or implied, as to description, quality, or productiveness of any seeds, plants or bulbs we may send out and we will not in any way be responsible for the crop. All seeds, plants and bulbs purchased from Graham Bros. must be accepted on these conditions or returned.

FAILURE OF SEEDS

Seeds of the best quality will often fail through improper treatment. Thus, a small seed may be sown so deeply that the young plant cannot reach the surface. More failures result from disregard of the conditions necessary to germination than from inferiority of the seeds used. These conditions are: a proper temperature, sufficient moisture, and free access of air. The soil must be in proper condition, and present no physical obstacle to the growth of the young plant. If heavy rains have compacted the surface of the soil, and the sun has baked it to a hard crust, it will be impossible, even if all other conditions are favorable, for the seedling plants to force their way through it, and many perish from this cause alone. Seeds differ greatly as to the temperature required for germination. Beets, Cress, Peas, etc., germinate rapidly at a temperature of 45°; but if Melons and other seeds of that family, bush or pole Beans, are sown under the same conditions, they will be apt to decay, as for their prompt germination they require a heat of at least 60°. For this reason many seeds fail yearly from too early sowing. The second condition, proper moisture, is likely to be violated by an excess rather than too small a portion. The proper amount is that which a well-drained soil will naturally hold. Free access of air is all-important, and this is interfered with by an excess of water in the soil.

EARLY ORDERS

We respectfully urge all intending purchasers of seeds to make up their wants as early in the season as possible and send in their orders, thereby greatly relieving the tension of the spring rush and insuring greater accuracy and care in their manipulation.

NAME, ADDRESS, Etc.—We beg our correspondents to give us on Each order their correct name and address; also to indicate **very precisely** the means of carriage which they prefer, whether by **Express, Freight or Mail**, and the office or railroad station which best serves their locality.

When Cash accompanies order WE DELIVER FREE OF EXTRA CHARGE to any Post Office in Canada all Seeds Priced in this Catalogue, except where specially noted, such as Beans, Peas, Corn, Grasses, Etc. . . .
